Google classroom, Clever, ClassLink and OneRoster compliant

Secure testing with Canvas, Schoology, and others

Smart filtering policies

Per-student or per-group policies

Focus-driven classes

Blocks! Manager empowers 21st-century teachers with a simple and efficient classroom Management System for Chromebooks and Windows-OS devices, giving them the ability, just by glancing at the Blocks! dashboard, to see what is on every device at any point of time during the class, and to collect analytics to improve pedagogy and develop their curriculum.

Dynamic Web and Youtube category based filtering allows teachers to enforce focus-driven classes, so that only the meaningful and relevant internet content is made available to the students.

Monitor every student's screen in the class in real-time

BLOCKS!

Content filtering and Classroom management for Chromebooks, and Windows-OS devices!

See live what's on every Chromebook or Windows-OS or device in your class

Close tabs, Share content, 100% uptime

Restrict web content during Assessments

Trend Analysis and Insightful Analytics

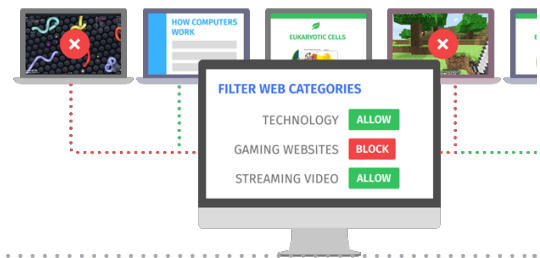

Lockdown browser

Enforce and manage internet content on every Chromebook and Windows-OS device

Proactively and automatically filter the Internet in your class

Manage your class remotely with Conference mode

Easy importing and record-tracking

Blocksi Manager is fully Google Classroom Compliant so you can import existing Google Classroom classes or create your own. You can also Import class rosters from other student information systems like Clever and OneRoster.

Powerful Blocksi analytics lets you view browsing history of every class session and tracks statistics while class is running. It allows you to distill student activity into measurable results arranged by student, class, time, blocked/allowed content, number of URL visits and more. Activity reports are saved after every class session and can be exported in a PDF file.
